Foundational Alert Helper skills, learn how to: Identify someone at risk of suicide / How to connect with them / Who to connect them to. safeTALK is a 4 hour alertness training that prepares anyone over the age of 15, regardless of prior experience or training, to become a suicide-alert helper. Most people with thoughts of suicide don't truly want to die, but are struggling with the pain in their lives. Through their words and actions, they invite help to stay alive. safeTALK-trained helpers can recognise these invitations and take action by connecting them with life-saving intervention resources, such as caregivers trained in ASIST.
